Re: Dublin TCE Draft ROD

Dear Jill:

The Department of Environmental Protection (Department) has reviewed the Draft Record of Decision for Operable Unit 2 (groundwater remediation) at the Dublin TCE Superfund Site. The Department does not propose any significant changes for inclusion in the Final ROD. However, we would like to reiterate our concern that using a monitoring well as an injection well may provide a false indication of progress in remediation of the Site.

I look forward to receiving the Final ROD for this Site. In the meantime, if you have any questions, I can be reached at 610-832-6202.

Sincerely,

Grant Morehead  
Project Manager  
Environmental Cleanup Program
